

BIMETAL THERMOMETERS

Application:

To measure the temperature of different fluids and gases in the heating systems, climatic systems and other systems for heating air and fluids.

Materials:

parts	acc to DIN
Body	steel CrNi - steel
Parts in contact with the fluid: plunged part nut	CrNi - steel CrNi - steel brass

Note:

The thermometer is offer:
straight type
angle type

Size (mm):

D	60 80 100 160
H	stainless steel body 19 steel body 14
L	0 - 1000*
d	10 12
h	20

Note:

Min L* depends of the measuring range.

Range (°C):

-20+50	0+50	0+100	0+120
0+150	0+200	0+250	0+300

Ends:

1/2"
